

POLYDIGI AND IPIFICATION BRING SEAMLESS USER AUTHENTICATION TO THE FINANCIAL INDUSTRY

Benefit Vantage Limited's technology is the basis of PolyDigi's solution "SimKeyGo powered by IPification"

(7 November 2019 – Hong Kong) **IPification** and **PolyDigi** are announcing a strategic partnership that will enable traditional and virtual banks worldwide to enjoy the benefits of a mobile authentication solution which combines enhanced user security, frictionless UX, and protects users' privacy.

PolyDigi will offer *SimKeyGo powered by IPification* to the financial services industry, and enable their customers from the banking industry to enjoy the benefits of IPification's superior authentication solution.

Curtis Chan, PolyDigi's CEO, announced the partnership by saying: "We are very excited to partner with IPification and integrate their GMID Box capabilities into our SimKeyGo solution. It's clear that banks and financial institutions are looking for innovative and affordable ways to protect and retain their clients. Partnership with IPification means we will be able to provide banks and other financial institutions with exactly what they are looking for."

Harry Cheung, Founder & President of IPification, pointed out that "this is the best way to secure banks, payment institutions, investment companies, and their clients. They will all benefit from the newly integrated SimKeyGo powered by IPification platform."

Stefan Kostic, IPification's CEO, added: "Partnership between IPification, the best telco-based authentication solution on the market, and PolyDigi, an expert on protecting financial institutions, will enable banks to use the authentication technology that combines top-notch security, protects user privacy, and enables a smooth user experience. I see this cooperation as a win-win for everyone."

About Benefit Vantage Limited & IPification

www.ipification.com // [Twitter](#) // [LinkedIn](#) // [Facebook](#) //

Benefit Vantage Limited (BVL) is a leading provider of cybersecurity and data backup solutions globally. BVL and its group of companies are incorporated in Switzerland, Serbia and Hong Kong, where they represent big brands like F-Secure and Acronis and develop its own solutions.

BVL's flagship product is IPification, based on close partnerships with mobile operators to offer seamless authentication and fraud protection against device change and SIM swap attacks. IPification enables mobile applications and service providers to offer their users authentication that is secure, protects their privacy, and enables a smooth user experience.

About PolyDigi

www.polydigi.com

PolyDigi delivers a patented SimKeyGo telco authentication service that allows banks to protect their apps and online internet banking service in real-time for their clients without any privacy issues.
